## **Braun Intertec hires Jeffrey A. Gebhard, PE, as Vice President of Engineering**

MINNEAPOLIS (April 28, 2011) - Braun Intertec, one of the Upper Midwest's premier engineering, consulting and testing firms, is proud to announce that **Jeffrey A. Gebhard, PE**, has been hired as **Vice President of Engineering**. In this role, Mr. Gebhard will oversee the company's strategic engineering initiatives.

"Braun Intertec is experiencing tremendous growth in a number of different markets throughout the Midwest. We are very pleased with the opportunity to once again provide Jeff's engineering expertise to our clients, especially in the areas of deep foundations, design-build projects and the transportation market in general. Jeff's unique technical background and exceptional consulting skills make him a tremendous asset to our firm," said Braun Intertec CEO Jon Carlson.

This will be Mr. Gebhard's second time at Braun Intertec. He began his career as a geotechnical engineer with the Minnesota Department of Transportation. In 2006, Mr. Gebhard joined Braun Intertec and quickly rose through the engineering ranks to the position of Principal Engineer. It was while working for Braun Intertec that he served as the lead geotechnical engineer for a number of large projects, including the Lowry Avenue Bridge and the I-35W Bridge project. As part of the I-35W Bridge project, he oversaw a unique and important deep foundations testing program that was later recognized for its innovative and cost-saving design by the Minnesota Society of Professional Engineers, the Deep Foundations Institute and the Minnesota chapter of the American Council of Engineering Companies. In 2010, Mr. Gebhard decided to pursue an opportunity as a geotechnical lead for Kiewit, an international construction company, before returning to Braun Intertec this April.

-MORE-

“Working for a construction firm before rejoining Braun Intertec helped me gain an invaluable perspective of our clients’ needs,” Mr. Gebhard said. “I plan to share the lessons I’ve learned with my colleagues and utilize this perspective companywide to better understand our clients’ needs.”

At Braun Intertec, Mr. Gebhard will be responsible for overseeing the company’s engineering operations, service delivery and growth.

*Based in Minneapolis, employee-owned Braun Intertec ([www.braunintertec.com](http://www.braunintertec.com)) is a premier engineering and environmental consulting and testing firm that has about 430 employees located in multiple Twin Cities offices, as well as in Duluth, Hibbing, Little Falls, Rochester, Mankato and St. Cloud. The firm also has offices in Bismarck and Fargo, N.D., La Crosse and Waukesha, Wis. and Cedar Rapids, Iowa. Braun Intertec Geothermal, LLC, is a wholly owned subsidiary of Braun Intertec.*
